(B) An e-commerce company maintains product stock information in the products table and stores completed orders in the sales table. Create a PostgreSQL stored procedure that accepts a **product name and required quantity as input parameters** and processes the purchase only when sufficient stock is available.

The procedure should verify the available quantity of the requested product. If sufficient stock exists, it should retrieve the product code and price, calculate the total sale amount, insert a new order into the sales table, reduce the available stock, and increase the total quantity sold. If sufficient stock is not available, the procedure should not modify any data and should display an appropriate notification message.

The total sale amount should be calculated as:

Sale Price = Product Price × Quantity Ordered

CODE:

```
CREATE OR REPLACE PROCEDURE pr_buy_products(
    IN p_product_name VARCHAR,
    IN p_quantity INT
)
LANGUAGE plpgsql
AS $$
DECLARE
    v_product_code VARCHAR(20);
    v_price FLOAT;
    v_count INT;
BEGIN
    -- Step 1: Check if product exists and has enough quantity
    SELECT COUNT(*)
    INTO v_count
    FROM products
    WHERE product_name = p_product_name
    AND quantity_remaining >= p_quantity;
    -- Step 2: If sufficient stock
```

```
IF v_count > 0 THEN
    -- Fetch product code and price
    SELECT product_code, price
    INTO v_product_code, v_price
    FROM products
    WHERE product_name = p_product_name;
    -- Insert a new record into the sales table
    INSERT INTO sales (order_date, product_code, quantity_ordered, sale_price)
    VALUES (CURRENT_DATE, v_product_code, p_quantity, (v_price * p_quantity));
    -- Update stock details
    UPDATE products
    SET quantity_remaining = quantity_remaining - p_quantity,
    quantity_sold = quantity_sold + p_quantity
    WHERE product_code = v_product_code;
    -- Confirmation message
    RAISE NOTICE 'PRODUCT SOLD..! Order placed successfully for % unit(s) of %.',
    p_quantity, p_product_name;
ELSE
    -- Step 3: If stock is insufficient
    RAISE NOTICE 'INSUFFICIENT QUANTITY..! Order cannot be processed for %
    unit(s) of %.', p_quantity, p_product_name;
END IF;
END;
$$;

CALL pr_buy_products ('MacBook Pro 14"', 1);
```

Data Output	Messages	Notifications
NOTICE: PRODUCT SOLD..! Order placed successfully for 2 unit(s) of Sony WH-1000XM5 Headphones. CALL		
Query returned successfully in 173 msec.
