

HOMETASK

(A)

Given a table containing information about bank deposits and withdrawals made using Paypal, write a query to retrieve the final account balance for each account, taking into account all the transactions recorded in the table with the assumption that there are no missing transactions.

CODE:

```
SELECT
    account_id,
    SUM(
        CASE
            WHEN transaction_type = 'Deposit' THEN amount
            ELSE -amount
        END
    ) AS final_balance
FROM transactions
GROUP BY account_id;
```
